Full-time internship: 25 Jan - 23 Apr 2027

PROFILE

Software Engineering student with two apps on the App Store and Bupples on Google Play. I build Flutter experiences with native widgets, offline behavior and careful release validation.

EDUCATION

Sunway University | Bachelor of Software Engineering (Honours)

Expected Aug 2027

Dual-award programme in partnership with Lancaster University

TECHNICAL SKILLS

Programming: Dart, TypeScript; Swift and Kotlin (native integrations)

Mobile and data: Flutter, Riverpod, Capacitor, Firebase, RevenueCat, SwiftUI, WidgetKit, RemoteViews

Testing and tools: Flutter tests, Firebase Emulator Suite, Git, native release validation

Spoken languages: English (fluent), Arabic (native)

SELECTED PROJECTS

Bupples | Shared expense app

Feb 2026 - Present

Sole developer | Flutter, Firebase, TypeScript | Released on iOS and Android

- Shipped the Flutter app on iOS and Android, owning shared-expense flows, Firebase services, receipt scanning, RevenueCat subscriptions and store releases.
- Integrated iOS WidgetKit and Android RemoteViews balance widgets through shared payloads, account-readiness checks and deduplicated updates.
- Matched client previews to server-written receipt shares with exact arithmetic and property-based money-conservation checks across expense and settlement flows.

Adelante | Quote app and native widgets

Jun 2026 - Present

Flutter, SwiftUI, WidgetKit, Kotlin | Released on the App Store

- Released an iOS quote app with Apple Watch and Messages extensions; implemented Android widgets with Kotlin and RemoteViews.
- Built offline quote discovery and a widget studio, sharing cached content and deterministic rotation rules across Dart, Swift and Kotlin.
- Refined phone, iPad and Watch interactions, preserving reading state and checking adaptive layouts at five widths and 2x text in recorded October validation.

Planket | Shared-calendar prototype

Oct 2026 - Present

Next.js, Capacitor | Web demo; native builds in development

- Built a shared-calendar web demo with Next.js and Capacitor iOS/Android targets, including availability comparisons, RSVP alternatives and rescheduling flows.

LEADERSHIP

Sunway Cybersecurity Club | Digital Marketing Executive

Jan 2026 - Present

- Coordinate event and recruitment content with committee members, translating briefs into graphics, LinkedIn posts and communications for cybersecurity meetups and industry visits.
